LABELING SOLUTIONS

Products need labeling

Tube labeling systems

AXON
Made in Germany

Reliable tube and vial labeling using AXON

Tubes

Vials

Samples identified in real time

Unique labeling enables samples be assigned quick and reliably in labs.

In practice, self-adhesive labels are applied individually to tubes or vials. 1D or 2D encoding enables samples be processed fully automated in transport and filing.

AXON has been designed for direct thermal and thermal transfer label printing. 300 dpi or 600 dpi print resolutions favor sharp-edge and high-contrast print images. The smallest codes and fonts can be verified reliably.

A labeling cycle takes less than two seconds.

Tubes and vials with or without a closure cap can be inserted by hand or automated by a handling system.

Symbols on the control panel support AXON be operated intuitively. Replacing a label roll or a ribbon is no big deal. In cases of cleaning or wear, print rollers and transport rollers are easy to remove using a tool attached.

RS232, USB, Ethernet, WLAN and Bluetooth ensure data be transferred. AXON integrates to Laboratory Information Management Systems (LIMS).

If no PC is plugged, variable data can be entered on a control panel, with the help of a keyboard or a scanner.

110 VAC to 240 VAC input voltage at 50 / 60 Hz, 24 VDC to 60 VDC are options

AXON 1		AXON 2
Modules of a SQUIX 2P label printer and modules of the tube applicator are united in one chassis.	**Printer**	Standard SQUIX 4MP label printer providing an AXON 2 applicator
no more than 56 mm	**Label widths**	no more than 110 mm
vertical	**Tube / Vial orientation**	horizontal
Once tubes or vials have been inserted to the retainer, they can be filled and sealed.	**Particularity**	Identified tubes and vials can be ejected automatically, for example to a tray.
7 - 26 mm a maximum of 38 mm may be possible upon request	**Tube / Vial diameters**	7 - 22 mm
20 - 130 mm	**Tube / Vial lengths**	25 - 120 mm
Warning on a label roll ending Codes be verified	**Options**	-

AXON 1 tube labeling systems

1 **Ribbon retainer**
Materials are easy to remove with the help of a three-part tightening axle.

2 **Antistatic brush**
Electrostatic charge dissipates after printing, in particular if plastic materials are in use.

3 **Transport roller**
Labels are applied to tubes or vials.
Height setting according to the length of a tube or vial

4 **Control panel**
Intuitive operation using self-explanatory symbols
Rotation in steps of 90° by software command

5 **Internal liner rewind unit**
Materials are easy to remove with the help of a three-part tightening axle.

6 **Print roller**
Synthetic rubber favors highly accurate print images.

7 **Peel-off plate, extended**
It promotes labels be applied reliably to tubes or vials.

8 **Pinch roller**
Tubes or vials are pressed against the transport roller as labels are applied.

9 **Solid cast aluminum chassis**
Base of all components

10 **Base plate**
Height setting enables labels be located accurately to target positions on tubes or vials.

processing labels 5 mm to 25.4 mm wide

Small tubes or vials can be inserted more easily.

Options provided for AXON 1 tube labeling systems

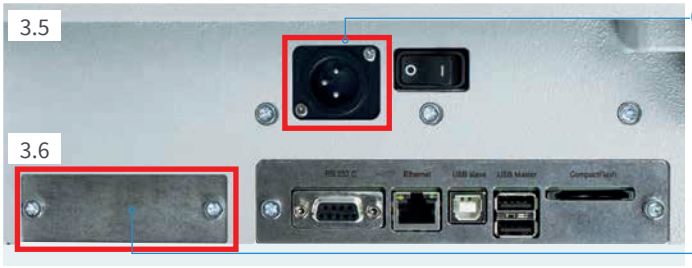
Cast aluminum cover
It prevents from contamination.
A large inspection window is provided.

CC200-AXON code verifier
1D* codes are checked by a camera.
One code per label can be verified in terms of readability (GOODBAD). Results are compared with the print data (VERIFY).

*2D codes in preparation

Warning on a label roll ending, in preparation
Remaining roll diameters are detected by a sensor.
The I/O interface indicates predefined minimum values.
Diameters may be requested or displayed also using data interfaces.

K Type peel-off plate, customer-specific
If closures of tubes or vials interfere with a peel-off plate, adaption is required.



1 **24 VDC - 60 VDC input voltage**
Instead of standard power supply, a 24 VDC to 60 VDC module can be installed. A mating plug is provided on delivery.

2 **Digital 24 VDC I/O interface**
SUB-D socket connector, 25 pins

or

3 **2 port Ethernet switch 10/100 Mbit/s**
Another terminal device can be plugged to a shared network. Signals loop through.

AXON 2 tube applicator

See further information on SQUIX 4MP label printers
www.cab.de/en/squix

1 Peel-off plate
Adapted specifically to tubes and vials

2 TRV 14 transport roller (Ø 14 mm)
Labels are applied to tubes or vials of diameters 10 mm to 22 mm. By moving the roller along the shaft to specified positions, closure caps or protruding threads remain located beside the roller.

Operations require labels no more than 56 mm wide and a Type 56 peel-off plate. In cases of smaller diameters or wider labels, adapted transport rollers are provided as options.

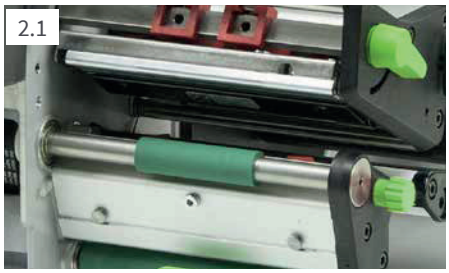
3 Pinch rollers
Aligned according to the length of a tube or vial
Tubes or vials are pressed against the transport roller as labels are applied.

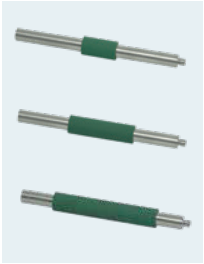
4 Swivel arms providing a stop
Axial setting according to the length of a tube or vial and the label position

5 Material replacement
Pivoting the applicator simplifies labels or ribbons be replaced.

6 Tray
Tubes or vials ejected automatically after printing are collected.

Options provided for SQUIX 4MP label printers





Slim DR4-M print rollers

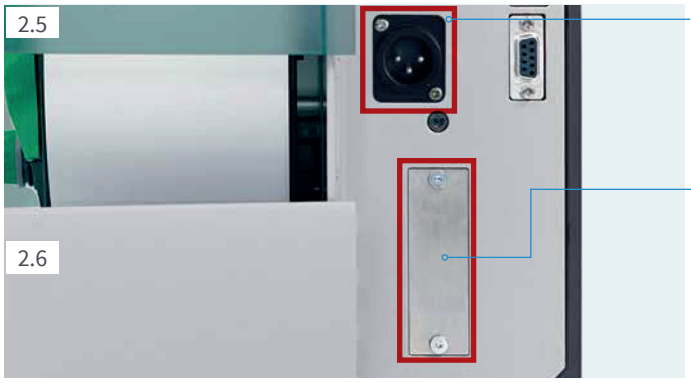
If narrow labels are in use, accurate print images require adapted print rollers. Enhanced roller wear and contamined print heads are avoided, so are errors during label feed.

DR4-M30 - labels no more than 25.4 mm wide
DR4-M60 - labels no more than 56.0 mm wide
DR4-M80 - labels no more than 76.0 mm wide

Peel-off plates

Feeding below a pulley promotes labels be dispensed reliably.
Type 56.1 - labels nor more than 56 mm wide (Ø14 mm)*
Type 56.2 - labels nor more than 56 mm wide (Ø18 mm)
Type 110 - labels no more than 110 mm wide (Ø14 mm)
K Type - customer-specific, if closures of tubes or vials interfere with a standard peel-off plate

*Included in scope of delivery



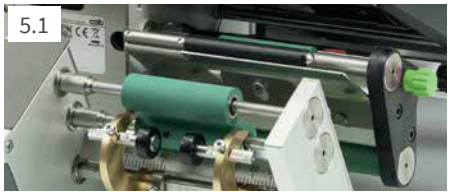
1 24 VDC - 60 VDC input voltage
Instead of standard power supply, a 24 VDC to 60 VDC module can be installed.

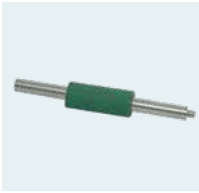
2 24 VDC digital I/O interface
SUB-D socket connector, 25 pins

or

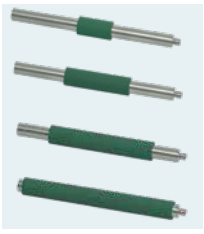
3 2 port Ethernet switch 10/100 Mbit/s
Another terminal device can be plugged to a shared network. Signals loop through.

Options provided for the AXON 2 tube applicator





TRV 18 transport roller (Ø 18 mm) up to 56 mm label width
Labels are applied to tubes or vials of diameters 7 mm to 12 mm. By moving the roller along the shaft to specified positions, closure caps or protruding threads remain located beside the roller. Operations require labels no more than 56 mm wide and a Type 56 peel-off plate.



Transport rollers

If tubes with diameters 10 mm to 22 mm are in use

Type	maximum label width	peel-off plate
DR4-M30	25.4 mm	56 mm
DR4-M60	56.0 mm	56 mm
DR4-M80	76.0 mm	110 mm
DR4	110 mm	110 mm

TRK transport roller, customer-specific
If tube or vial dimensions do not coincide with specified transport rollers

Type 56, type 110 or K Type peel-off plates are required.

Control panel

Intuitive operation
Settings are easy to configure using self-explanatory symbols.

1. **LED:** Power ON
2. **Status bar:** Receive data, record datastream, warning on a ribbon ending, SD memory card / USB stick plugged, Bluetooth, WLAN, Ethernet, USB slave, Time
3. **Printer status:** Ready, pause, number of labels printed on a print job, label in peel-off position, awaiting external start signal
4. **USB slot** to plug a service key or a memory stick, to store data in the internal IFFS printer memory
5. **Operation**
   - Print and apply labels step by step
   - Jump to menu
   - Reprint the last label
   - Interrupt and continue a print job
   - Stop and delete all print jobs
   - Label feed

Accessories

They are plugged or screwed to a printer by the customer.

2.7		**SD memory card**
2.8		**USB stick**
2.9		**USB WLAN stick** 2.4 GHz 802.11b/g/n Hotspot or infrastructure mode
2.10		**USB WLAN stick with a rod antenna** 2.4 GHz 802.11b/g/n + 5 GHz 802.11a/n/ac Hotspot or infrastructure mode Extended range of operation
2.11		**USB Bluetooth adapter**
2.12		**I/O interface plug** SUB-D, 25 pins All control signals can be attached to the I/O interface using clamping screws.

2.13		**External operation panel** If the operation panel of a printer cannot be accessed, an additional external one can be plugged. Same functionality as on the printer Landscape or portrait mode Operability as desired on the external operation panel or on the printer
		Printer connectivity: USB 2.0 Hi-Speed device cab provides specified **connecting USB cables** for power supply. Lengths are 1.8 m to 16 m.
2.14		**TR2 hand switch** A digital I/O interface is required
4.1		**Connecting RS232-C cable** 9/9 pins, 3 m

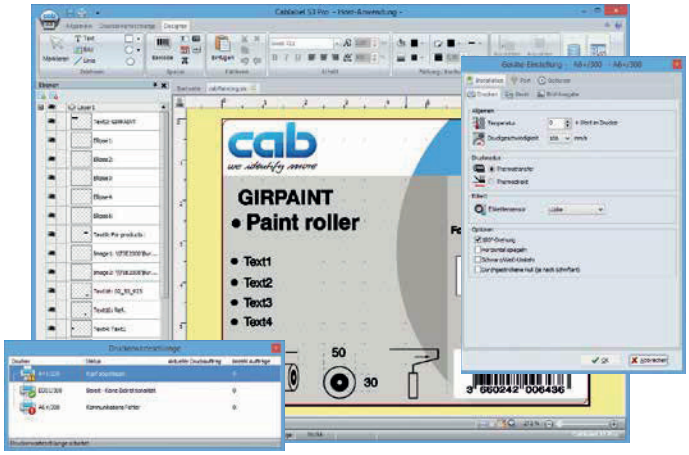
Free and Open Source software are part of cab products.
For information see **www.cab.de/opensource**

cablabel S3 software

Design, print, administrate

cablabel S3 opens up the full potential of cab devices.
If designing a label, the modular software adapts to requirements. Plugins are provided, such as the JScript Viewer to support native JScript programming. The user interface and the JScript code synchronize in real time. Features such as the Database Connector can be included, so can barcode verifiers.



For further information see
www.cab.de/en/cablabel

Stand-alone printing

Printers in this mode of operation are able to select labels and print them when no host is connected.

Labels are designed on a PC, using software such as cablabel S3 or a text editor. Label formats, contents, graphics and data off a database are stored on a memory card, a USB stick or in the internal IFFS printer memory.

Only variable data are sent to a printer from a host system such as a keyboard, a barcode scanner or a scale and/or requested from a host by the Database Connector and printed.

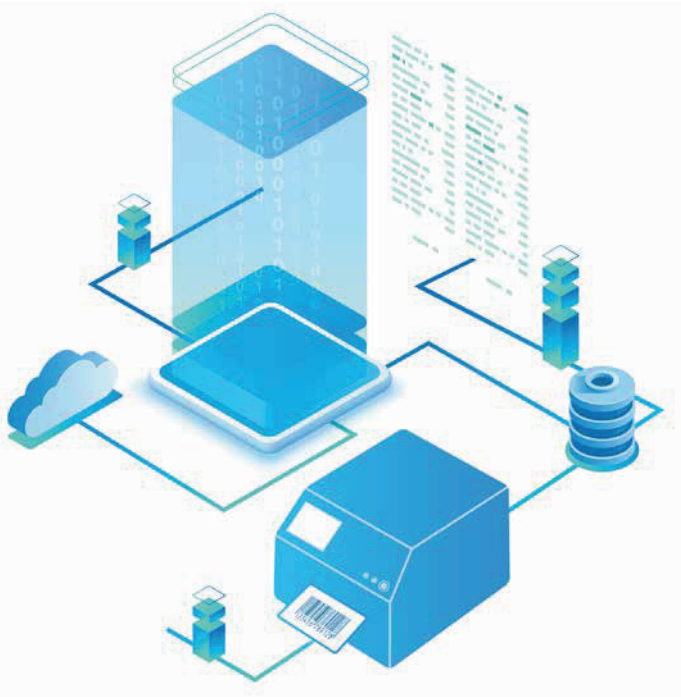
OPC UA

The latest cab printers are ready to interact with machines and components of different manufacturers in industrial plants.

An OPC UA server and an OPC UA client are part of the firmware.

The OPC UA server enables a printer be configured and controlled and dynamic print data be edited using a selected programming interface.

The OPC UA client enables data on other OPC UA-ready machines be read and included on a label design.
No additional software is required.



Printer control

Drivers

cab provides 32 / 64 bit drivers to control with software other than cablabel S3. Running them requires at least operating systems Windows Vista, Mac OS 10.6, Linux CUPS 1.2.

Windows[1] drivers
WHQL-certified to guarantee maximum reliability with Windows operating systems

Mac OS X[2][3] drivers
Based on CUPS
Running with all programs in Mac OS X

Linux[3] drivers
Based on CUPS

Free download on **www.cab.de/en/support**

Programming

JScript
Embedded programming language developed by cab
Free manual download on **www.cab.de/en/programming**

abc Basic Compiler
Integral part of the firmware
It adds to JScript in terms of programming a printer before data are edited for processing. External printer languages can be replaced without intervening in print jobs in process, data be transferred also from scales, barcode scanners or a PLC, and further.

Integration

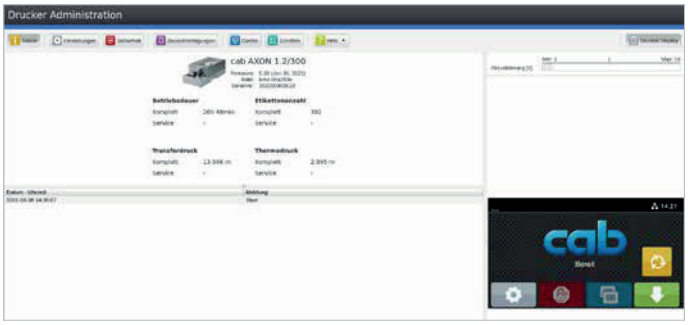
Printer Vendor program
cab is a member
A replace method enables cab printers be controlled from SAP[4] R/3 using SAPScript. Only variable data are sent by a host system to the printer. Data such as pictures and fonts, which had been transferred to a local memory (IFFS, memory card, etc.) before, are collected.

Step 1		Step 2		Step 3
Labels and replace files designed on cablabel S3	›	Variable data replaced in SAPScript using replace files	›	Printout from SAP

Printer administration

Configuration on the Intranet / Internet

By integrating a HTTP and FTP server, printers can be controlled, firmware be updated and memory cards be managed using a standard web browser or a FTP client. Administrators and operators are notified of states, warnings and errors via email or datagrams, on the basis of a SNMP / SMTP client. Time and date synchronize on the basis of a time server.



Database Connector

Printers plugged to a network can access data directly from a central ODBC / OLEDB database to print on a label. During printing, data can be resent to the database.

Checklist for AXON tube labeling systems

Download checklist on
www.cab.de/en/axon-conf

Customer / Customer no. _____
Contact _____
Phone _____
Street _____
Zip code / City _____
Email _____

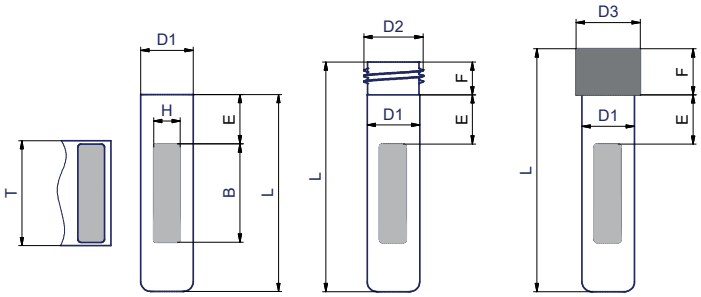
Date of issue _____
Target date _____
Project owner _____
Project control _____
Configurator no. _____
(filled in by cab)

1. Label
Width B _____ mm
Height H _____ mm
Type of material _____
Width T of liner _____ mm

2. Print method
2.1 ☐ Direct thermal
2.2 ☐ Thermal transfer

3. Ribbon
Width _____ mm
Type of material _____
Winding ☐ inside ☐ outside

4. Tubes / Vials
1 Diameter D1 _____ mm
2 Diameter D2 _____ mm
3 Diameter D3 _____ mm
4 Length L _____ mm
5 Distance E _____ mm
6 Height F _____ mm
7 Insertion / Removal ☐ by hand ☐ automated



☐ 5561500 **System aligned and checked**
Required are approx. 100 tubes / vials
1 label roll
1 ribbon roll

AXON 1

5. Tube labeling systems

5.1	☐ 5984920.xxx	AXON 1.1/300 tube labeling system
5.2	☐ 5984930.xxx	AXON 1.1/600 tube labeling system
5.3	☐ 5979600.xxx	AXON 1.2/300 tube labeling system
5.4	☐ 5979740.xxx	AXON 1.2/600 tube labeling system

6. Options

6.1	☐ 5988215.250	Cover
6.2	☐ 5988255.250	CC200-AXON code verifier (provided upon request)
6.3	☐ 5979765.250	Warning on a label roll ending (in preparation)
6.4	☐ 5551407.250	DC/DC converter 24 - 60 VDC (in preparation)
6.5	☐ 59xxxxx.250	K Type peel-off plate (customer-specific)
6.6	☐ 59xxxxx.250	Kit for processing tube diameters 26 mm to 38 mm

Filled in by cab:
Practicable ☐ **yes** ☐ **no**
Name _____
Phone _____
Email _____

Date _____ **Signature** _____

Customer approval required after check of practicability:
☐ **yes** ☐ **no**
Name _____
Phone _____
Email _____

Date _____ **Signature** _____

AXON 2

5. Tube / Vial opens to the ☐ right ☐ left

6. Tube / Vial removal ☐ as inserted ☐ off a tray

7. Label printers configured for tube applicator use

7.1	☐ 5977023.xxx	SQUIX 4.3/300MP label printer
7.2	☐ 5977007.xxx	SQUIX 4/300MP label printer
7.3	☐ 5977008.xxx	SQUIX 4/600MP label printer

8. Options provided for label printers

8.1	☐ 5953700.xxx	DR4-M30 print roller (max. label width 25.4 mm)
8.2	☐ 5953701.xxx	DR4-M60 print roller (max. label width 56 mm)
8.3	☐ 5953702.xxx	DR4-M80 print roller (max. label width 76 mm)
8.4	☐ 5987212.xxx	Type 56.2 peel-off plate (Ø 18 mm)
8.5	☐ 5979925.xxx	Type 110 peel-off plate (Ø 14 mm)
8.6	☐ 59xxxxx.250	K Type peel-off plate (customer-specific)
8.7	☐ 5551407.250	DC/DC converter 24 - 60 VDC (in preparation)

9. Tube applicator

9.1	☐ 5987150.xxx	AXON 2 tube applicator providing a Type 56.1 peel-off plate (Ø 14 mm) a TRV 14 transport roller (Ø 14 mm) a tray

10. Options provided for tube applicator use

10.1	☐ 5987151.xxx	TRV 18 transport roller (Ø 18 mm)
10.2	☐ 5953700.xxx	DR4-M30 print roller (for transport roller use)
10.3	☐ 5953701.xxx	DR4-M60 print roller (for transport roller use)
10.4	☐ 5953702.xxx	DR4-M80 print roller (for transport roller use)
10.5	☐ 5954180.xxx	DR4 print roller (for transport roller use)
10.6	☐ 59xxxxx.250	TRK transport roller
	☐ 5535960	TRK one-off costs

Options are parts or components to perform special functions. They are assembled in addition to or instead of standards. In cases of options be assembled ex factory, the part numbers are added by .250. Options delivered separately are added by .001.
